

A French inventor has secured a... camera, by means of which photographs may be taken on board of a ship even when the sea is running high.

The enthusiastic welcome home to Whitely Reid was quite as much to the editor as to the returned foreign minister.

Those who year after year quietly submit to injustice deserve to suffer from it.

The recent private in the United States army is a good deal more of a gentleman than the training, gambling, tyrannical officer who endeavors to fix a great social gulf between them.

How to Have Good Manners. Doubtless thousands of young people, and not a small number of old ones, with every day of their lives that they could learn the secret of fascinating others by means of their graceful, exquisite manners.

There is no place for practicing manners like the home circle, no place, permit me to say, where it will be so appreciated. It will be a cultivation of heart, mind and body, this endeavor to feel nothing but affection for the home people.

The Rapid Transit City. A startling feature is that of Thomas Curtis Clark's proposal for the necessary rapid transit in cities.

More Americans than Europe make the daily trip to business from the suburbs. In New York 1,400,000 persons a day are forced to travel to the city.

In Chicago there is the same trouble even with the cable lines running swiftly to and fro. The greatest growth of Chicago dates from the completion of these cable lines.

One unexpected fact we find in the paper, and that is that suburban transportation for short distances in America costs less than half as much as it does in Europe.

The Real Use of Aluminum. In The Cosmopolitan Magazine Mr. Joseph W. Richards strips the new metal of some of the glamour of romance which has grown up around it.

The method of getting the metal from clay was a French discovery, and in 1825 aluminum was twelve dollars a pound.

It is gradually being used more and more in a larger quantity, but a large part of it will be used in alloys.

Aluminum will never be the universal metal that iron is, but it will largely supplant copper, iron, brass, tin, lead, zinc, silver, gold, platinum, etc.

The first case on record in which an Indian has sought relief from nutritional tortures in divorce has occurred in Chamberlain, S. D.

One of the problems that this country must grapple immediately is that of land irrigation or reclamation, which over method will bring water to the agriculturist in the west.

The question of who shall perform the work of irrigation is a difficult and even dangerous one. The United States government itself cannot build and control irrigation works.

There is a feeling among financiers that Europe must at length come to the use of silver money as a legal tender on account of the growing scarcity of gold.

The daughter of Debarre, Miss Marie Girardy Debarre, says she has come to this country to show Americans what her father's mysterious science of expression is.

Miss H. P. Dime, of the treasury department Washington is president of the Women Army Nurses association.

Farm Villages. Among the schemes to make the lot of American farmers a happier one is that of having the agriculturalists of a neighborhood build their homes clustered together in a village.

The enterprising wedge in the Canada business was introduced into the Dominion by a resolution declaring that, subject to the approval of her majesty's imperial advisers, representatives of the Canadian government should be attached to the British legation at Washington to look after the interests of their country.

Millionaire John W. Cookwater is now in Europe studying the farm village. He intends to inaugurate the system on his own lands at Cookwater, Neb.

Archbishop Ireland, of St. Paul, formulated a plan whereby Roman Catholic children might receive education at the state expense and still be brought up in their religion.

Remember, in a new treatment you take a chance. It is a life or death matter.

JOHNSON'S ORIENTAL SOAP. Medicinal and Toilet Soap. It is the most perfect and most economical of all soaps.

THE JAPANESE LIVER PELLETS. Recent discovery of Pellets cure Biliousness in 10 to 15 days, easy to take, and reliable.

Scientific American Agency for PATENTS. TRADE MARKS, COPYRIGHTS, etc.

Invest from \$1000 to \$5000. Real Estate. Cobblestone City.

NERVOUS DEBILITY. A gentleman has been cured of Nervous Debility and all its effects of early indigestion and general debility.

NERVOUS DEBILITY. A gentleman has been cured of Nervous Debility and all its effects of early indigestion and general debility.

children of the burden of the expense of the schools and still give the children opportunity for training in church doctrines.

Now is the time when the graduating girl's brain is racked with intensity of thought, not so much about her commencement essay as about her commencement gown.
