

GREAT FALLS, MONTANA,

THE MANUFACTURING AND COMMERCIAL METROPOLIS OF NORTHERN MONTANA.

Where labor and capital are combining with phenomenal resources to build up the *Most Important City* between Minneapolis and Portland. The *Future Great* is rapidly becoming the *Present Great*. **THE GREAT FALLS SILVER-LEAD SMELTER** now employs three hundred men. Its companion industry, the still greater, *The Boston and Montana Copper Smelter and Refining Works* of Great Falls are now building. Simultaneous with the construction of the mammoth plant is the improvement of the water power at Black Eagle Falls upon such a scale as to furnish power for hundreds of industries and **EMPLOYMENT FOR THOUSANDS OF MEN**. In the construction of the dam and copper works alone, at least seven hundred men will be employed during the coming spring and summer. The Sand Coulee coal mines are turning out from 1,500 to 2,000 tons of coal per day, thereby providing work for another four hundred men.

THE RAILROAD TO THE BELT MOUNTAINS

is nearly completed, and the Great Falls & Canada Railroad is now building, connecting Great Falls with the C. P. R'y at Lethbridge. Lying tributary to Great Falls are some of

The Richest Mining Camps in Montana

Great
Falls

heads the list as the greatest Wool Market in Montana. is in the heart of, and is accessible from all parts of, the richest agricultural and stock raising district in Montana. but four years of age, has a population of at least 3,000 inhabitants. is favored with excellent schools, nearly all church denominations and a public library.

Great
Falls

is already a railroad center, and new roads to it are among the certainties of 1890. has electric lights, an excellent system of water works, a great hotel, two banks, substantial buildings, solid mercantile houses, a saw mill, a planing mill and a flouring mill, which is kept busy grinding Northern Montana wheat. with its manufacturing, mining, stock growing, agricultural and commercial advantages, offers an unrivaled field to the home seeker and the investor.
